## SUMMARY

Full Stack Developer with over a year of experience in scalable web application development, specializing in the MERN stack (MongoDB, Express.js, React.js, Node.js) and responsive design. Proven track record in building and integrating front-end and back-end components, developed a hospital appointment system that reduced booking time by 30% and increased user engagement by 25%, as well as manufactured an interactive cafe management system that reduced errors in order processing by 40%. Seeking a position to apply my expertise in JavaScript frameworks, server-side logic, and user interface development to support innovative solutions and real-world project delivery.

## EXPERIENCE

### AI/ML Intern

UnizzTech 10/2024 - 11/2024

- Worked closely with a skilled team and participated in projects to gain hands-on experience in advanced AI and ML technologies, contributing to innovative projects and enhancing technical expertise by 25%.

### Web Development Intern

Tech Alpha 04/2024 - 05/2024

- Implemented a secure password generator using advanced cryptographic algorithms, a jQuery-based task management system with real-time updates, and an intuitive age calculator in modern JavaScript.

### Full Stack Web Developer

CodersHub Infotech 10/2021 - 04/2022

- Designed responsive web applications with JS, BS5 and PHP implemented user authentication and reviewed optimised performance for 25% faster load Times

## EDUCATION

### Bachelor of Technology (B.Tech) in Information Technology

Malwa Institute of Science & Technology

11/2022 - Present

## PROJECTS

### Hospital Appointment System

03/2025 - 03/2025

- Developed a Hospital appointment system with JWT auth and dynamic scheduling features, reducing appointment booking time by 30%.
- Enhanced user experience by implementing responsive UI components using React.js, Bootstrap 5, and MongoDB, improving user engagement by 25%.

### MGW-Capital Website

05/2024 - 05/2024

- Designed a loan application website with HTML5, CSS3, and captivating animations, resulting in a 20% increase in loan application submissions.
- Ensured seamless, responsive design for optimal customer experience across all devices, achieving a 98% mobile responsiveness score.

### Barista - Coffee shop

08/2023 - 08/2023

- Built a dynamic cafe management system with menu management and secure online ordering using React.js, Node.js, and MongoDB, streamlining order processing and reducing errors by 40%.
- Implemented a responsive user dashboard for order tracking, increasing user satisfaction by 35%.

## CERTIFICATION

## KEY ACHIEVEMENTS

💎 Letter Of Recommendation (LOR)

- Received a Letter of Recommendation for outstanding performance during the AI/ML internship at UnizzTech.

💎 Top Performer Recognition

- Earned the #Top1 spot among peers in the internship program, reflecting exceptional dedication and skill.

💎 Best Performer Award

- Awarded the "Best Performer" memento for exceptional contributions and commitment to excellence.
